BankDetails Component

The `BankDetails` component is a react accordion tab component that renders bank-related details of a user along with verification status.

Import Statement

```
import BankDetails from './BankDetails';
```

Props

Name	Type	Required	Description
data	object	yes	An object containing the user's bank details.

Example

This example shows how the BankDetails Component can be used to display user's bank details in a dashboard. It also displays a verification status of recent transaction.

```
import React from 'react';
import BankDetails from './BankDetails';

const Data = {
  bankDetails: {
        accName: "Rahul Dhibar",
        accNumber: "5223344598732232",
        bankName: "ICICI Bank",
        bankBranch: "J P Nagar",
        MSMENo: "ICIC000061",
```

```
      },
}

function App() {
  return (
    <div>
      <BankDetails data={Data} />
    </div>
  );
}

export default App;
```
